

SecureRAG Sample Employee Handbook

Fictional Company: NovaTech Solutions

Purpose: Sample document for Retrieval-Augmented Generation (RAG), document loading, embedding, retrieval, grounding, and guardrail testing.

1. Company Overview

NovaTech Solutions is a fictional technology company used for AI application testing. The company provides software engineering, data analytics, cloud services, and artificial intelligence solutions. Employees are expected to follow company policies, protect confidential information, and use company resources responsibly.

2. Work Schedule and Remote Work

Standard working hours are 9:00 AM to 5:00 PM, Monday through Friday. Eligible employees may work remotely up to three days per week with manager approval. Employees working remotely must remain available during core collaboration hours from 10:00 AM to 3:00 PM Eastern Time. Company devices must be used when accessing confidential business systems.

3. Paid Time Off

Full-time employees receive 15 paid vacation days per calendar year. Employees also receive 10 paid sick days per year and 3 personal days. Vacation requests of three or more consecutive business days should be submitted at least two weeks in advance. Unused vacation days may carry over up to a maximum of 5 days into the next calendar year.

4. Holidays

NovaTech Solutions observes 10 company holidays each year. The holiday calendar is published by Human Resources at the beginning of each year. Employees required to work on an observed company holiday may receive an alternative paid day off with manager approval.

5. Health and Retirement Benefits

Eligible full-time employees may enroll in medical, dental, and vision insurance. Coverage begins on the first day of the month following 30 days of employment. NovaTech Solutions also offers a 401(k) retirement plan with a company match of up to 4 percent of eligible employee contributions. Benefit elections may normally be changed during annual open enrollment or after an eligible life event.

6. Parental Leave

Eligible employees may receive up to 12 weeks of parental leave following the birth, adoption, or placement of a child. Six weeks are company-paid, and the remaining eligible leave may be coordinated with applicable federal or state leave programs. Employees should contact Human Resources as early as possible to plan parental leave.

7. Information Security

Employees must protect company credentials, confidential documents, customer information, and internal systems. Passwords must not be shared with coworkers or external parties. Multi-factor authentication must be enabled when required by company systems. Sensitive data should only be accessed when necessary for an employee's authorized job responsibilities.

8. Acceptable Use of AI Systems

Employees may use approved AI assistants for research, summarization, drafting, and internal productivity tasks. Employees must not submit passwords, authentication tokens, Social Security numbers, payment card information, or confidential customer data to unapproved AI systems. AI-generated responses must be reviewed before they are used for business decisions. AI systems must not be treated as the final authority for legal, financial, security, or employment decisions.

9. IT Support

Employees experiencing technical issues should create an IT support ticket. Critical issues include inability to access company systems, suspected account compromise, malware warnings, and lost company devices. Critical security incidents should be reported immediately to the IT Security team. Normal IT requests are generally reviewed within one business day.

10. Confidentiality

Confidential information includes non-public financial information, customer records, employee records, source code, security configurations, business plans, and proprietary research. Employees may access confidential information only when required for their authorized duties. Unauthorized disclosure of confidential information may result in disciplinary action.

11. Code of Conduct

Employees are expected to communicate professionally, treat coworkers with respect, avoid harassment and discrimination, and report suspected policy violations through appropriate company channels. Retaliation against an employee who makes a good-faith report is prohibited.

12. Policy Questions

Employees should contact Human Resources for questions about leave, benefits, workplace conduct, or employment policies. Employees should contact IT Support for technical issues and the IT Security team for security incidents. When information is unclear, employees should rely on the most recent official company policy rather than assumptions or AI-generated content.

Quick Reference

Policy	Sample Rule
